

Cognitive Walkthrough: Rosetta Song - Amber Green

- Will the user know what to do at this step?
 - First, she would probably click around and try to figure out what the website is.
 - Then, she may try to make an account or login
 - Then, I think she may get a little lost because there is no menu to find anything else
 - If she were to find the log into services page, I think she may continue to there and try to find out what to do to upload her playlists.
 - Once she clicks get started, she will add her songs or playlists to make for her friends.
 - I think she may not know how to export since there so far is not a share button

- If the user does the right thing, will the user know that they did the right thing and is making progress toward the goal?
 - I think she would click around until she found the correct option. She may not know how to do anything, just keep going until she figures it out.
